

HELIOS Base UB+

Superior Server Foundation for all HELIOS Products

HELIOS Base UB+ is the innovative foundation used by all HELIOS UB+ products. It incorporates the advanced server technologies developed by HELIOS over many years. These core HELIOS technologies include the service controller, printing system, authentication server, remote administration, networking and imaging libraries, tools and more. HELIOS Base provides the foundation for all HELIOS products.

Ease of Use The concept of HELIOS Base is to make your server easy to use and manage. Installation, configuration, and updating are very straightforward. Even switching between supported platforms takes only minutes, and preserves all custom HELIOS settings.

Server Fail Safety HELIOS software is made for mission-critical environments. HELIOS Base adds another level of server fail safety. The HELIOS Service Controller starts, stops and monitors all HELIOS services. Separate processes per active user are generated, to enforce file security and ensure process safety. If any HELIOS service fails the HELIOS Service Controller will restart the service.

Smart Ideas for Better Networking.

Advanced Printing System HELIOS Base provides the state-of-the-art HELIOS printing system to all other HELIOS products.

HELIOS Authentication Server supports LDAP, AD/PDC, NIS and local users. Even mixed environments, e.g. LDAP, AD/PDC and backup servers are supported.

HELIOS mDNS Server ("Bonjour") enables automatic discovery of computers, devices, and services on IP networks without the need to enter IP addresses or configure DNS servers.

SQL desktop database indexes all server files, enabling near instant file searches. Allows system snapshots and backups while the file system is in use.

HELIOS DHCP Server provides TCP/IP configurations to Windows, Mac, and other network devices. Includes DHCP backup server capability. Dynamic DNS updates are also supported.

There is no extra cost for HELIOS Base.

Features & Benefits

Ease of Use

- Easy to install, administer, use
- Remote server administration from Mac, Windows and UNIX

Server Features

- Server fail safety via the HELIOS Service Controller. Automatic logging and restart of failed services
- Advanced printing system, UNIX "lpr" compatible, 64-bit print job support
- Authentication server with LDAP, AD/PDC, NIS and local user support
- SMTP messaging & mail tool
- Process auditing and tracing tools
- Unicode 16-bit character support
- 64-bit large file support
- Easy migration to other platforms
- DHCP main and backup server
- mDNS server ("Bonjour")
- CLI "dt" utilities (mv, rm, cp, ls,...)
- HELIOS software installer
- HELIOS update installer w/ rollback
- Server preferences repository
- ICC-Profiles repository
- HELIOS SDK available

Flexibility

- All major server platforms

System Requirements

Supported HELIOS Base Server

- One of the following server systems:
Apple Mac OS X, Linux, Sun Solaris, IBM AIX
Details: www.helios.de/platforms
- TCP/IP network connection, optional NFS, LDAP, AD/PDC, NIS, DNS, ...

Product Highlights

Server Installation

- Fast, menu-driven installation, easy installation for system administrators
- Extensive documentation in printed, PDF, and online manuals

Server Administration

- Remote server administration from Mac OS X, Windows, and UNIX via HELIOS Admin over TCP/IP and HTTP
- Manages local users, volumes, printers, server settings, security settings, TCP/IP access lists, logs, etc.
- Remote server file browsing & editing
- RSA 1024-bit encrypted passwords
- HELIOS Services, "srvutil" front end to manage different services
- Open files tool
- Central start/stop HELIOS scripts
- CLI "dt" utilities for file management

Server Fail Safety

All services are managed and monitored by the HELIOS Service Controller.

- If a process fails, other processes are not affected
- Automatic reporting of problems
- Automatic service restart if required
- Allows third-party integration

HELIOS Update Installer

Each HELIOS file has a version number managed by our version control system

- Automatic download of updates
- Automatic installation of updates
- Option to roll back installed updates

A product from:

HELIOS Software GmbH
Steinriede 3
30827 Garbsen
Hannover, Germany
Fax: +49-5131-709325
Internet: www.helios.de

HELIOS, EtherShare are trademarks of HELIOS Software GmbH. Others are the property of the respective owners. Product specifications are subject to change without notice.
5/2008

- 24 MB free RAM for HELIOS Base, additional memory will be used by caching and provides faster performance. Memory requirements for other products – see data sheets

Authentication Server

- Central server supports authentication of local host users, LDAP, NIS, and Windows AD/PDC users
- "authutil" tool to look up accounts and verify/change user passwords
- Optional script to allow/deny logins by user, service, TCP/IP, time, etc.

DHCP Server

Built-in DHCP server automatically distributes DNS, router, WINS and TCP/IP addresses to Windows and Mac clients. A second server can be used as a DHCP backup server, in case the main server fails.

HELIOS mDNS Server ("Bonjour")

- Supports multiple network interfaces
- Proxy for non-Bonjour devices
- Tools and API included

SQL desktop database

- Transactional 64-bit desktop file

Server Auditing & Monitoring

Live monitoring and tracing of any HELIOS service and/or individual session, to isolate/identify problems. It complements network and system traces.

Unicode

All HELIOS services utilize Unicode

- Unicode UTF-8 is used for file names
- "uniconv" tool converts encodings
- All major encodings are supported
- HELIOS SDK to add/use encodings

HELIOS products using Base

- HELIOS EtherShare UB+
- HELIOS PCShare UB+
- HELIOS WebShare UB+
- HELIOS ImageServer UB+
- HELIOS PDF HandShake UB+
- HELIOS PrintPreview UB+

Migration to other platforms

All installed HELIOS products and settings can be transferred to any supported platform. All server settings including volumes and printers are automatically re-created on the new system by transferring the HELIOS "var" folder.

Advanced Printing System

Large server sites require a superior printing system to manage their printing needs. The HELIOS printing system includes key features like custom spool directories, moving of jobs between queues, reprinting and archiving of jobs, full error feedback and control, etc. It is lpr/lpd compatible, supports PostScript, PDF and other jobs with many features:

- Error and hold queues for all queues to reprint and monitor the jobs done
- Print job accounting
- Remote LPR printers – LPR Bonjour
- 64-bit print jobs (no 2/4 GB limit)
- Printing via TCP/IP stream (socket)
- Print to disk including compression
- Time queue to specify printing times
- Balance queue for load balancing
- Clone queue for multiple workflows
- Print to AppleTalk PAP printers (requires EtherShare UB+)
- Print to Windows SMB/CIFS printers (requires PCShare UB+)
- Print to Create PDF queue (requires PDF HandShake UB+)
- Print to PDF bitmap proof queue (requires PrintPreview UB+)

Base UB+ for Windows

Advanced Print Services and HELIOS Server Foundation

HELIOS

HELIOS Base UB+ for Windows

provides a state-of-the-art print server for Windows, and a foundation for all other HELIOS products. It is well known for its reliability, performance, and ease-of-use, and incorporates the advanced server technologies developed by HELIOS over many years. These core HELIOS technologies include the service controller, printing system, remote administration, networking and imaging libraries, tools and more.

HELIOS Advanced Printing System

Provides a superior printing system to manage the printing needs of any size operation. The HELIOS printing system includes key features like custom spool directories, moving of jobs between queues, reprinting and archiving of jobs, full error feedback and control, etc. It is "lpr/lpd" compatible, supports PostScript, PDF and other jobs. Its features are available to all network clients. Windows queues are integrated via a gateway to HELIOS queues. Mac clients benefit from faster printing via the HELIOS exclusive TCP Bonjour printer driver. Detailed print job accounting information is easily reviewed or

Smart Ideas for Better Networking.

exported.

The advanced printing system is tightly integrated with ImageServer, PDF HandShake, and PrintPreview to serve the widest range of prepress needs.

HELIOS mDNS Server ("Bonjour")

enables automatic discovery of computers, devices, and services on IP networks without the need to enter IP addresses or configure DNS servers.

Remote Administration using HELIOS Admin from Windows, Mac and UNIX clients is easy to use, allows managing server settings, printer queues, and logs, and creating printing workflows by cascading different queues/options.

Scalability is built-in, from small sites with only a few clients to enterprise sites with the most demanding requirements.

HELIOS supports a variety of server platforms with equal feature sets, identical administration, and the same release dates. This gives customers the flexibility to choose the right server for their needs, budgets, and future plans.

Features & Benefits

Ease of Use

- Easy to install, administer, use
- Remote server administration from Windows, Mac and UNIX

Print Server Features

- LPD/LPR compatible and CLI tools
- Job management via "drag and drop"
- Print spooler for Mac OS 9 & OS X clients, via PAP or TCP/IP
- Print spooler for Windows clients, gateway from Windows spoolers to HELIOS queues
- Flexible output options: Remote LPR, TCP/IP stream, Print to Disk, SMB/CIFS, AppleTalk PAP, Time Schedules, Job Balance, and Clone queues, with extensive print job logging and accounting
- Error and Hold/Reprint queues
- Create PDF option: PDF HandShake
- Proofing option: PrintPreview

Server Features

- Process auditing and tracing tools
- UNIX "dt" CLI tools (mv, rm, cp, ls,...)

Flexibility

- All major Windows platforms

EtherShare UB+

Highest-Performance Server for Mac Clients

HELIOS

HELIOS EtherShare UB+ allows easy integration of powerful servers into Mac networks. It provides an extremely fast, reliable, feature-rich Apple compatible file and print server to unlock UNIX performance for Mac clients. It is well known for its reliability, performance, and ease-of-use.

Mac OS X and AFP 3.1 Support ensures full compatibility with Apple standards, including support of large files, long file names and server reconnect. It works with any Mac out of the box, without the need to train users. EtherShare is easy to set up. It installs on the server in minutes. All further management is done remotely via HELIOS Admin with an easy to use GUI interface. It is simple to configure users, groups, volumes, print spoolers, server settings, log files, etc.

EtherShare not only offers impressive file and print services with easy remote administration, but also many additional features which prove extremely useful for daily work. The TCP/IP based file server can fully utilize faster networks like Gigabit or 10 Gigabit Ethernet.

Smart Ideas for Better Networking.

TCP/IP Print Spooling via the EtherShare exclusive TCP printer drivers supports mDNS ("Bonjour") for easy printer selection on Mac OS X 10.4/10.5 clients, with automatic setup of the PPD. Detailed print job accounting information is easily reviewed or exported to other programs.

Authentication via LDAP, AD/PDC, NIS and local server users is fully supported by the HELIOS Authentication server included in HELIOS Base.

EtherShare Scales well from small sites with only a few Macs to enterprise sites with the most demanding requirements, and always remains easy to administer. EtherShare is tightly integrated with ImageServer, PDF HandShake, and PrintPreview to serve the widest range of prepress needs. Add PCShare and WebShare for a true cross-platform solution. HELIOS supports a variety of server platforms with equal feature sets, identical administration, and same release dates. This gives customers the flexibility to choose the right server for their needs, budgets, and future plans.

Features & Benefits

Ease of Use

- Easy to install, administer, use
- No client installation necessary
- Remote server administration from Mac, Windows and UNIX

Server Features

- AFP 3.1 File Server
- Full AFP File & Directory ID (Alias) support
- Server optimized "Find File"
- Multiple network adapter support
- Print spooler for PAP & TCP/IP
- Mac OS 9/X TCP printer drivers
- Shared volume compatibility with PCShare and WebShare

Client Support

- Mac OS 8.1-10.5

HELIOS Base Features

- Advanced printing system
- Authentication server
- CLI "dt" utilities (mv, rm, cp, ls,...)
- Unicode/UTF-8 file representation

Flexibility

- All major server platforms

System Requirements

EtherShare Server

- One of the following server systems:
Apple Mac OS X, Linux, Sun Solaris, IBM AIX
Details: www.helios.de/platforms
- 16 MB RAM; 4 MB per active client
- At least one network adapter

Product Highlights

Server Installation

- Fast, menu-driven installation, easy installation for system administrators

Client Installation

- No special drivers for file & print services required
- Optional TCP Bonjour printer driver

Server Administration

- Remote server administration from Mac OS X, Windows, and UNIX via HELIOS Admin
- Manages users, groups, volumes and printers, server settings and logs
- System & printer administrator groups
- Share volumes and printers
- Server auditing/monitoring support
- TCP/IP access lists management
- Manage spool queues with “drag & drop” ease
- Handle printer accounting data
- Easy setup of AppleTalk routing
- Manage detailed accounting information including fonts used, pages, etc.

HELIOS “dt” Utilities

Mac files are handled properly with “dt” enhanced file commands including rm, mv, cp, set, ls, mkdir, touch, chmod, chown, chgrp, etc. This allows powerful scripted workflows to support Mac data and resources as well as additional Windows file streams.

A product from:

HELIOS Software GmbH

5/2008

Mac Clients

- Mac with OS 8.1-10.5
- Optional HELIOS PCShare integrates Windows clients, WebShare allows web-based server access.

File Services

EtherShare supports AFP privileges, fast “Find File”, Alias, etc. All server disk space including NFS volumes, DVD, etc. can be re-shared. Mac files are stored in a way that Mac, Windows, and UNIX can fully share documents. Extremely fast: using 1 Gigabit Ethernet yields over 80 MByte/sec to Mac clients; more than 600 MByte/sec sustained total server throughput.

Server Features

- AFP 3.1 compatible for Mac OS X clients including long file name support, large file support, server reconnect and sleep-wakeup support, and full UNIX permissions
- TCP/IP & AppleTalk PAP print spooler
- TCP/IP printer drivers for Mac OS X with Bonjour printer discovery
- TCP/IP printer drivers for Mac OS 8/9
- User authentication for local host users, LDAP, NIS, and AD/PDC users via included authentication server
- Desktop database for super fast “Find File” and Mac file ID support
- Smart permissions to automatically inherit permissions from parent folder
- Full Mac OS 8/9 client compatibility
- Windows NTFS file stream support handles streams for copy/move, etc.
- Unicode volumes store all file names in 16-bit Unicode/UTF-8 format. This allows the same file names for UNIX, Windows, Mac and Web clients
- Quota support

More details on the HELIOS Web site: www.helios.de/products/productshows.phtml

—

- Additional EtherShare network tools help to analyze and troubleshoot the network: HELIOS LanTest, HELIOS File System Test, Xtar, etc.

Advanced Printing System

HELIOS Base provides the state-of-the-art HELIOS printing system to all other HELIOS products. See details in Base data sheet. EtherShare offers powerful printing services with flexible, remote queue management. Support of PPD files per spool queue allows exploiting special printer features. Hold and Error queues hold all successful or all erroneous print jobs for easy postprocessing and troubleshooting. Balanced queues print to the next available printer of a group of printers. EtherShare accepts text, PostScript, and raw print jobs.

Optional Printing Features

Create PDF Server automatically creates PDF files from each print job. PrintPreview produces a PDF bitmap proof of every print job. PDF separation printing & OPI image replacement.

Flexible Licensing Scheme

The server license is tied to a specific machine and a certain number of users. 5 or 20 user server base licenses are available. EtherShare user expansions are available in steps of add. 10 or 100 users. Optional maintenance agreements: Internet Updates, Software Upgrade Service, cold spare licenses.

PCShare UB+

Highest-Performance Server for Windows Clients

HELIOS PCShare UB+ allows easy integration of powerful servers into Windows networks. It provides an extremely fast, reliable, feature-rich Windows compatible file and print server to unlock UNIX performance for Windows clients. It is well known for its reliability, performance, and ease-of-use.

Windows SMB/CIFS support ensures full compatibility with standard Windows programs, including multi-user applications, and excels in ease of use. Sharing files and printers is simple and straightforward because there is no additional software necessary for Windows clients. Windows NTFS Unicode and file streams support ensures compatibility with modern Windows applications. Mac meta data is accessible via SFM compatible streams. UNIX permissions and quotas are fully supported.

Windows Explorer Extensions allow managing UNIX file and folder permissions from the client. The HELIOS Meta extension enables adding, editing and viewing comments and color labels of files on HELIOS volumes or local disks. This data also is visible to Mac and

WebShare clients. Fast server file search finds files in PCShare volumes within seconds, via the indexed HELIOS desktop database.

HELIOS Admin supports easy setup of users, groups, volumes, printers and server settings from Windows, Mac, or UNIX/Linux clients.

Authentication via LDAP, AD/PDC, NIS and local server users is fully supported by the HELIOS authentication server included in HELIOS Base.

PCShare scales well from small sites with only a few Windows clients to enterprise sites with the most demanding requirements. Optional EtherShare and WebShare yield a true cross-platform solution. PCShare is tightly integrated with PDF HandShake, ImageServer and PrintPreview to serve the widest range of prepress needs. HELIOS supports a variety of server platforms with equal feature sets, identical administration, and same release dates. This gives customers the flexibility to choose the right server for their needs budgets, and future plans.

Features & Benefits

Ease of Use

- Easy to install, administer, use
- No client installation necessary
- Remote server administration from Mac, Windows and UNIX

Server Features

- Windows compatible file and print server (SMB/CIFS)
- Windows file streams support
- Server optimized "find file"
- UNIX permission support in Explorer
- File meta data support in Explorer
- Multiple network adapter support
- Printing to local PC printer
- Printing to EtherShare "lpr" queues
- EtherShare volume compatibility

Client Support

- Windows Vista, XP, 2000, NT 4, etc.

HELIOS Base Features

- Advanced printing system
- Authentication server
- Unicode/UTF-8 file representation
- CLI "dt" utilities (mv, rm, cp, ls, ...)

Flexibility

- All major server platforms

Smart Ideas for Better Networking.

System Requirements

PCShare Server

- One of the following server systems:
Apple Mac OS X, Linux, Sun Solaris, IBM AIX
Details: www.helios.de/platforms
- 16 MB RAM; 4 MB per active client
- At least one network adapter

Product Highlights

Server Installation

- Fast, menu-driven installation, easy installation for system administrators

Client Installation on Windows

- No installation necessary because PCShare is compatible with the Windows built-in networking software
- Installer for HELIOS extensions to Windows Explorer for file search, setting file permissions, color labels, and comments via the file properties dialog

Server Administration

- Remote server administration from Windows, Mac, and UNIX via HELIOS Admin
- Manages users, groups, volumes and printers, server settings and logs
- System & printer administrator groups
- Share volumes and printers
- Define DHCP server configuration
- Server auditing/monitoring support
- Additional WINS server or client configuration, workgroup/domain name and server name configuration
- TCP/IP access lists management.

Security Options

PCShare supports TCP/IP access lists to deny or allow networks and/or nodes to access the server. Custom TCP/IP access lists per volume. Secure NTLMv2 authentication is supported.

A product from:

HELIOS Software GmbH
Steinriede 3
30827 Garbsen
Hannover, Germany
Fax: +49-5131-709325
Internet: www.helios.de

© 2008 HELIOS Software GmbH. All rights reserved.
HELIOS, EtherShare are trademarks of HELIOS Software GmbH. Others are the property of the respective owners. Product specifications are subject to change without notice.
5/2008

Windows clients

- Windows Vista, NT 4, 2000, XP, 2003
- Windows 95, 98, ME
- PCShare client for DOS & Win 3.1x
- Optional HELIOS EtherShare integrates Mac clients. WebShare allows web-based server access

File Services

PCShare offers extremely fast file services. Due to its great performance PCShare allows hundreds of PCs to work on a server. All server disk space including NFS volumes, DVD, etc. can be used for re-sharing. Server directories appear as Windows drives.

Fast find file search uses the HELIOS desktop database to return results in seconds, even in very large volumes.

- Windows Explorer context menu
- "Find file" tool on server and client

Server Features

- SMB/CIFS server offers Windows compatible file and printer sharing
- User authentication for local host users, LDAP, NIS, and Windows AD/PDC users via included authentication server in HELIOS Base
- Full file and record locking support
- Advanced file caching support using "oplocks"
- Windows NTFS file stream support
- Windows file/directory attributes: Creation date, Hidden, System, Read-only and Archive are supported
- UNIX permissions support
- Quota support
- Unicode volumes store all file names in 16-bit Unicode/UTF8 format. This allows the same file names to be used from UNIX, Windows, Mac and Web clients, including special characters.

- Automatic name services routing between multiple network ports
- WINS client, server and WINS proxy

Print Services

PCShare allows printing to Windows local printers and to server connected printers, as well as to all EtherShare queues. PostScript and "raw" printing is supported.

DHCP Support

PCShare clients can automatically receive DNS, router, WINS and client TCP/IP addresses from the HELIOS DHCP server included in HELIOS Base.

HELIOS Base benefits

The PCShare file server uses HELIOS Base, which provides these core HELIOS technologies: Server fail safety, Unicode support, networking, and more.

Flexible Licensing Scheme

The server license is tied to a specific machine and a certain number of concurrent users. There is a 5 or 20 user server base license available. PCShare user expansions are available in steps of additional 10 or 100 users. Optional maintenance agreements are available: Internet Update Access, Software Upgrade Service Agreement, cold spare licenses.

WebShare UB+

Highest-Performance Server for Real Time Remote File Access

HELIOS WebShare UB+ enables fast and secure real time remote file access via any web browser. Now authorized users can easily use your file server wherever they are, without exposing the server to the Internet. Working with files remotely has never been easier.

Easy Remote File Access by customers, suppliers, business partners or employees will eliminate the need to make files available via e-mail, burning CDs, or FTP, which often cause compatibility problems and waste resources. Automatic e-mail notification allows monitoring when files are being accessed. The easy to use web interface means no user training is required.

High Security is provided by a two-tier server application. The WebShare web server handles the web user interface on a separate server to ensure that the main file server is not available on the Internet. The server file system security is enforced according to the user credentials. Sharepoint based security allows further restrictions per user, e.g.: browse, preview, download, upload and file management.

Smart Ideas for Better Networking.

Remote Collaboration becomes a reality with the fully automated two-way access to the server data. File browsing and management allow authorized users to manage files and folders remotely, similar to the local Windows Explorer or Mac Finder. Optional HELIOS Image-Server and PDF HandShake provide remote document previews, and offer Internet clients a live content verification/proof of PDF, QuarkXPress, and InDesign documents as well as of all major image formats. Remote OPI allows web clients to download OPI low-resolution images from the server and to upload completed documents for later printing with high-resolution images.

Authentication via LDAP, AD/PDC, NIS and local server users is fully supported by the authentication server included in HELIOS Base.

Fastest Performance HELIOS WebShare is highly optimized for secure remote file access and provides several times faster download and browsing performance compared with FTP, WebDAV, AFP, and SMB/CIFS volumes mounted via the Internet.

Features & Benefits

Ease of Use

- Easy to install, administer, use
- All major web clients supported

Server Features

- Two-tier server application
- Sharepoints with custom permissions
- Server optimized "Find File"
- RSA crypted login & HTTPS support
- Brandings, personalized GUI per user
- Custom "Action Scripts" & Forms

Remote File Access

- Browse files and directories
- Download and upload files/folders
- On-the-fly Mac/Win ZIP compression
- File management: permissions, copy, rename, delete files and folders

Remote File Preview (Optional)

- QuarkXPress Mac/Win documents
- Adobe InDesign Mac/Win documents
- Acrobat PDF documents
- TIFF, EPSF, DCS-1 & 2, BMP, PICT, JPEG, JPEG 2000 and PNG images
- ICC color proofing

Flexibility

- All major server platforms

System Requirements

WebShare File Server

- One of the following server systems:
Apple Mac OS X, Linux, Sun Solaris, IBM AIX, Windows
Details: www.helios.de/platforms
- 32 MB RAM; 10 MB per active client
- Licensed per WebShare file server

Product Highlights

Server Installation

- Fast, menu-driven installation, easy installation for system administrators
- Web based administration

Client Installation

- Uses standard HTML web browsers, Java, JavaScript and Frames are not required

WebShare File Server

- Native program running on file server
- Supports Windows NTFS and UNIX Unicode/UTF-8 file systems
- File system security is enforced according to the user permissions, due to separate processes running with user credentials
- User authentication for local host users, LDAP, NIS, and Windows AD/PDC users via included authentication server in HELIOS Base.
- Virtual users/names are supported
- E-mail notification on activity
- TCP/IP security options, access lists
- Custom scripts with HTML forms
- E-Mail memo support included
- Priority/privileged user file transfer
- Server optimized "Find File"
- Detailed accounting audit trail
- Shared file comments (Web/Mac/PC)

WebShare Web Server

- Java program running on server with Internet connection
- Customizable user interface via built-in GUI-based branding editor

WebShare Web Server

- Java 1.4.x or newer runtime
- Any HELIOS supported server system
- WebShare web server will handle multiple WebShare file servers

Clients

- Windows, Mac, UNIX, iPhone clients using Safari, IE 6/7, Firefox

- Multiple language support
- WebShare web server uses one dedicated TCP/IP port for all web clients. (Optional firewall possible)
- No external CGI-programs used
- No data files are stored or cached on WebShare web server
- URL-based login parameters
- SSL content encryption is supported
- RSA 1024-bit encrypted passwords
- Utilizes Apple WebObjects technology
- Security white paper: www.helios.de/products/WS/security.phtml

WebShare File Server Tools

- "zipstream" generates on-the-fly ZIP files compatible with Mac and Windows file formats
- WebShare Perl scripts
Allow customization and auditing of web user actions, e.g.: login, download, upload, rename, duplicate, delete and copy files and folders
- Icon Collector tools for Mac/Win

WebShare Sharepoints

- Specify shared directories
- Users and groups are assigned to sharepoints
- Specify available options: browse, preview, download, upload, and file management (delete, copy, rename, move, create folders, etc.)
- Performance white paper: www.helios.de/products/WS/speed.phtml

Remote zoomable previews

Additional features provided by HELIOS ImageServer UB+:

- Previews of TIFF, EPSF, DCS-1, DCS-2, Scitex-CT, JPEG, PICT, BMP JPEG2000, JBIG2 and PNG images
 - QuarkXPress document previews for Mac and Windows documents
 - Adobe InDesign document previews for Mac and Windows documents
 - PDF document previews (via HELIOS PDF HandShake option)
- The remote document previews do not require access to the original documents, applications, images, fonts, etc.
- ICC color proofs of images and PDFs
 - URL based image access and API

HELIOS Base benefits

The WebShare File Server and the WebShare Web Server use HELIOS Base, which provides these core HELIOS technologies: Server fail safety, Unicode support, networking, and more.

Flexible Licensing Scheme

The WebShare File Server license is tied to a file server machine and a certain number of users. There is a 5 or 20 user server base license available. Expansions are available in steps of addl. 10, 100 or unlimited users. Optional maintenance agreements: Software Upgrade Service, cold spare licenses.

ImageServer UB+

Server-based Image Processing and ICC Color Transformation

HELIOS

HELIOS ImageServer UB+ is a server-based image conversion, color transformation and OPI image replacement solution, with integrated process and workflow automation. All major image formats and color spaces as well as XMP, EXIF, clipping path and ICC meta data are supported. Tasks can be automated via "hot folders", CLI tools, and OPI image repurposing. It is designed to shift very CPU-intensive image processing tasks from desktops to servers.

Image Conversion between any supported file format, resolution, compression and color space. ICC profiles can be tagged and/or applied. All image information can be retrieved. ICC/XMP/Path meta data can be imported and exported. Image resolution and sizes can be changed in existing files. Web preview generation with customizable x/y pixel resolution of images or XPress/InDesign documents are supported. Images with a clipping path can be converted to transparent PNGs.

Hot Folder Automation via "Script Server" and "Tool Server" integrates and automates server and client applications

Smart Ideas for Better Networking.

Server-based Color Management

Using ICC profiles, ImageServer can keep the original high-res images in RGB, Lab, or CMYK color space on the server and repurpose them for different conversion and printing needs. ICC profiles are applied on-the-fly for excellent image conversion, color matched proofs and composite or separated printing. Support throughout for 16-bits per channel. ImageServer also supports ICC v4 profiles, as well as DeviceLink profiles and Black Point Compensation.

OPI Support automatically creates a low-res image of all supported file formats for placement in any layout application. It replaces layout images on-the-fly with optimized high-res images during output. Remote users can be provided with layout images and return complete pages for final output. More benefits: www.helios.de/opibenefits

HELIOS PDF HandShake adds PDF file format support. HELIOS PrintPreview adds PS/EPS vector conversion support. WebShare allows web-based remote OPI, image and document previews.

Features & Benefits

Ease of Use

- Remote server administration from Mac, Windows and UNIX

Image Features

- Extensive image conversion options
- File formats: TIFF, EPS, DCS1&2, JPEG, PSD, JPEG2000, PNG, PDF,...
- Color spaces: Lab, RGB, CMYK, ...
- Reads/writes 16-bit/channel images
- Compressions: ZIP, JPEG, G3/4, ...
- Meta data: XMP, Paths, EXIF, ICC

Color Management

- Server-based ICC 4 color separation, proof matching, and conversion

Script Server and Tool Server

- See additional data sheet

OPI Image Repurposing

- On-the-fly OPI image replacement
- Automatic layout file creation after file has been saved on server (no polling)

Cross-Platform Client Support

- Mac, Windows, UNIX clients

System Requirements

HELIOS ImageServer

- 64 MB RAM in total, 8 MB per active image conversion/print device
- EtherShare UB+ for Mac clients, or PCShare UB+ for Windows clients, or WebShare UB+ for web clients
- Workstation to place and print OPI layout images to the HELIOS spooler

Product Highlights

Complete Cross-Platform Solution

ImageServer supports Mac, Windows and UNIX-based layout workstations, for true cross-platform functionality.

Integration with HELIOS Products

The HELIOS Admin program can handle all configurations. EtherShare, PCShare and WebShare inform the OPI and Script Server about any events in their directories so that proper actions can be taken.

Script Server & Tool Server

See the separate data sheet.

Server Image Conversion Features

Powerful image conversion tools

- Over 100 professional image conversion options handle spot colors, alpha channels, clipping masks, ICC profiles, XMP, etc. Allows to convert on-the-fly between any supported file format, color space, compression and resolution, including ICC transformations/tagging.
- Web browser optimized PNG images, true color with automatic clipping mask/alpha in any specified pixel/resolution
- Previews of XPress & InDesign documents (Mac/Win) via web or tools
- Image preview and conversion support for PSD/TIFF/PNG images with a transparent background
- PDF as image file format for archiving, OPI, image conversion

A product from:

HELIOS Software GmbH
Steinriede 3
30827 Garbsen
Hannover, Germany
Fax: +49-5131-709325
Internet: www.helios.de

© 2008 HELIOS Software GmbH. All rights reserved.
HELIOS, EtherShare are trademarks of HELIOS Software GmbH. Others are the property of the respective owners. Product specifications are subject to change without notice.
5/2008

- OPI-compatible applications like XPress and InDesign, etc.
- Any non-OPI-compatible software which can place and print EPS files
- Optional WebShare for remote OPI and image/document previews, PDF HandShake to support PDFs, HELIOS PrintPreview adds PS/EPS vector conversion support

Supported File Formats

- File Formats: TIFF, EPSF, DCS1&2, PNG, JPEG, JPEG2000, Photoshop, BMP, JBIG2, PICT, Scitex-CT, PDF as image, PDF vector (PDF HandShake option)
- DCS files are merged into composite
- Color Spaces: Line art, Grayscale, CIE Lab, XYZ, RGB, CMYK, Indexed, Multitone, and Spot
- Compressions: ZIP, JPEG, Compress, JPEG2000, CCITT-G3/4, etc.
- Bit depth: up to 16-bits per channel
- Support for down- & upsampling, cropping, rotate, and flipping
- Clipping paths and alpha channels can be enabled or ignored

ICC Color Matching/Separation

ImageServer includes the Heidelberg CMM for fast, accurate ICC color space transforms. Color matching is applied for layout generation, color proof printing, final output and image conversion. High-res raster or PDF images are automatically color matched on-the-fly to CMYK separations, to RGB, or to CIE Lab. ImageServer recognizes embedded ICC profiles or references in high-res images. Tools to embed ICC are included. ICC version 4 compliant, with support for DeviceLink and Grayscale ICC profiles, and BPC (Black Point Compensation).

OPI & Image Repurposing Features

- OPI standards 1.3 and 2.0
- Support of Omit EPSF & TIFF
- XMP and multiple paths supported
- XPress colorized images are supported via HELIOS OPI TuneUp XT Mac/Win
- DeviceN composite output support for TIFF, PSD, DCS2 & colorized images
- ICC support for printing, proof, etc.
- Automatic low-res file generation
- Flexible low-res Image options
TIFF, EPSF, JPEG, or PNG low-res with any desired resolution and color
- PDF-native OPI option supports
InDesign PDF export

As soon as image files are created or changed on the server by EtherShare, PCShare or WebShare clients, layout files are generated. OPI low-res file creation can be turned on for the entire volume (no "hot folder" required, no restrictions on OPI folders). Low-res files are stored in "layout" subdirectories.

PostScript/PDF Output Generation

On-the-fly PostScript Level 1, 2 and 3 generation with compression: ZIP, Compress, JPEG, CCITT-G4, OPI image replacement during output (no temporary files), image ICC color management, downsampling, and cropping during composite or separated output. PDF generation via PDF HandShake option.

HELIOS OpenImage SDK

API allows adding new file formats, etc.

PDF HandShake UB+

Create PDF Server · PDF Preflight · PDF Printing · PDF OPI

HELIOS PDF HandShake UB+ fully utilizes the benefits of PDF in existing production environments. Automated server-based PDF generation, PDF printing, PDF OPI, PDF preflight and batch tools boost productivity, and overcome today's PDF problems.

Create PDF Server is a highly automated server-based PDF creation solution. Mac, Windows and UNIX clients can print to a Create PDF printer queue which automatically creates PDF documents of any PostScript print job. Simply set up various print queues, each corresponding to a specific set of job options. This solution is able to automatically utilize multiple servers for the PDF creation, and scales from a few users to hundreds of users.

Smart ICC Color Management can color match every object within a PDF. Properly converts PDF to CMYK, with ability to detect and preserve raster and vector black, gray, white and pure CMY colors. Perfect to color-normalize PDFs. Source profiles, printer and proofer profiles and ICC rendering intents can be specified.

Smart Ideas for Better Networking.

PDF HandShake Printing offers correct separations and composite PDF printing on any PostScript output device. PDF HandShake capabilities include printing registration marks, custom page sizes, printing always with correct fonts, conversion of embedded TrueType and CID fonts to Type 1, and more. PDF HandShake is the perfect printing solution for any PDF document. It doesn't matter if the PDF is from MS-Office, QuarkXPress or InDesign – PDF HandShake printing will always print correctly.

PDF Preflight is included, with callas pdfinspektor integrated in the Create PDF printer queue and via "hot folders".

ImageServer OPI users can place EPS low-res files, which are automatically created from PDF high-res documents. During printout, the low-res files will be replaced with the PDF high-res data and printed correctly using the PDF HandShake printing technology. Printing to a Create PDF queue produces high-res or low-res PDF of all OPI print jobs. PDF with OPI references is fully supported and printing to an OPI queue replaces all OPI references.

Features & Benefits

Ease of Use

- Easy to install, administer, use
- Remote server administration from Mac, Windows and UNIX

Create PDF Server

- Uses Acrobat Distiller 4, 5, 6, 7 or 8
- Queue based workflow and settings
- Support for Win/Mac/UNIX clients

PDF Preflight

See the separate data sheet

PDF Printing

- PDF 1.7 compatible
- PDF flattening via Tool Server
- Composite, in-RIP & host separations, and proof printing support
- ICC color management
- Printing via "pdfprint" tool, server "hot folder" or Mac Acrobat plug-in

PDF & OPI via ImageServer

- PDF-native OPI with InDesign
- PDF transparency support
- EPSF low-res files from any PDF
- PDF to high-res EPSF conversion
- PDF preview generation

System Requirements

PDF HandShake on Server

- EtherShare UB+ for Mac clients, or PCShare UB+ for Windows clients, or WebShare UB+ for web clients
- PDF HandShake printing from any client via “pdfprint” tool, or Acrobat plug-ins for Mac, or via “hot folders” with optional ImageServer

- Create PDF Server requires Acrobat Distiller 4.0.5, 5, 6, 7 or 8 for Mac/Win
- Optional ImageServer for OPI and imposition features, WebShare for remote OPI and image/document previews, PrintPreview for a bitmap proof of PDF print jobs

Product Highlights

Printing

- Acrobat plug-in for printing directly from Adobe Acrobat 4-6, 8 on Mac
- “hot folder” printing from any client
- Print composite, host separated, and in-RIP separations including shadings and DeviceN
- PDF 1.0-1.7, PDF/X support
- ICC v4 support for printing
All colors will be changed to the output color space, e.g. CMYK according to the ICC profile. Paper white will be simulated when proof printing. Supports 16-bits per channel images, DeviceLink profiles and Black Point Compensation. Embedded ICC profiles can be used or ignored
- PDF tools included for batch processing and scripting: pdfprint, pdfcat, pdfinfo, pdfnote, pdftoeps, pdfform
- Hairline correction during printing
- Grayscale, black, white, and pure CMY detection with correct output
- Grayscale detection of indexed RGB color in PDF data with correct output
- Missing fonts in a PDF document will be detected and the job will not be printed until the font is available, e.g. via the HELIOS font server
- Options: overprint black text, negative printing, ignore OPI references for PDF printing, preserve PDF halftones
- Registration marks and bleed support
- TrueType & CID Font support (at present not for double-byte CID fonts)

PDF-native OPI & PDF Repurposing

Adobe InDesign users can place OPI low-res images and export low-res documents as PDF 1.4-1.7 into a “hot folder”. All OPI referenced images will be replaced with optimized and color matched originals into a high-res PDF file. Benefits are:

- Preserves PDF transparency, drop shadows and XMP meta data
- Server-based ICC color management
Apply and/or embed printer ICC profiles into PDF job, to transform images for different printing processes or include high-res image profiles
- Downsample replaced images
- Compress replaced images (G4, JPEG, JPEG 2000, ZIP, etc.)
- Low-res PDF can be repurposed for multiple settings/productions
- Remote page composition
Users can be provided with layout images and return complete pages for final output. HELIOS WebShare options allows web-based workflows

PDF and PostScript OPI

- EPSF layout files are automatically created from PDF documents to be used for placement and printing
- Automatic PDF replacement of OPI image references in a PDF document

PDF and Imposition

Acrobat plug-in to export low-res PDF versions of books for impositioning via PostScript imposition software.

Create PDF Server

- Automatic PDF creation via print queues on the server
- Support for Windows and Mac clients, UNIX clients via “lpr”
- Customized job options and security settings per queue allow different PDF creation settings
- Acrobat Distiller is used with HELIOS Create PDF Server on one or more dedicated Mac or Windows workstations for PDF creation
- Scalable via load balancing queues
- Centralized Create PDF queue administration within HELIOS Admin.
There is no configuration required on different Create PDF Server machines

Tool Server

Integrates and automates client-based applications.

- PDF transparency flattening
- HTML to PDF conversion
See the separate data sheet

PDF Internet Printing

A Web server solution to receive PDF print jobs from users over the Internet.

Flexible Licensing Scheme

The PDF HandShake license is tied to a specific machine. The total number of licensed HELIOS users per day is permitted to use PDF HandShake.

pdfInspektor

Server Automated PDF Preflight

PDF HandShake UB+ includes pdfInspektor from callas software

PDF is good, control is better

PDF HandShake includes pdfInspektor from callas software, a powerful solution for analyzing and preflighting PDF files to ensure that incoming and outgoing PDF files are production compatible.

HELIOS PDF HandShake UB+ integrates pdfInspektor into "Create PDF" printer queues, HELIOS Script Server "watched folders", and WebShare web-based PDF preflight. pdfInspektor allows automated server-based PDF file checks.

Server-based PDF preflight with pdfInspektor is Acrobat 6/7/8 Professional preflight compatible. It checks PDF files according to PDF 1.2 - 1.7 and PDF/X specifications. Test profiles customized and approved in Acrobat can be exported and stored on the server. The fully automated check is done on the PDF HandShake server so no additional Acrobat workstation is required. Over 600 test characteristics can be defined and combined in preflight test profiles. 20 industry-standard profiles are included to allow a quick start. They can be customized to meet precise needs.

Smart Ideas for Better Networking.

Flexible PDF Preflight Reports are available as text, XML, and HTML files, or as an annotated PDF indicating areas with errors or warnings.

pdfInspektor is compatible with any PDF documents of the PDF 1.2 - 1.7 and PDF/X-3 specifications. Even the most complex PDF files are efficiently checked, including "Form XObjects". Compared to other solutions, pdfInspektor never modifies the original PDF files when checking them, which preserves job ticket and XMP meta data. Validates and creates PDF/X-1a, PDF/X-3, PDF/X-4, PDF/A-1a, PDF/A-1b.

PDF standard corrections can automatically be performed by PDF HandShake Print and "Create PDF Server" to fix problems such as hairline minimum size, preserve black, convert TrueType and CID fonts to Type 1, recognize and correctly convert RGB defined white, gray and black objects, and perform ICC-based color conversion for the printing process.

Features & Benefits

Ease of Use

- Easy to install, administer, use
- Remote PDF preflight administration from Mac, Windows, and UNIX

Analyzing and preflighting PDF

- Automatic PDF preflight provides reliable PDF input and output control
- PDF preflight integrated into PDF HandShake "Create PDF" queues
- "Hot folder" based PDF preflight via optional HELIOS ImageServer
- Precise test characteristics specified in each test profile (> 600)
- Test report in ASCII, XML, or PDF
- Validates and creates PDF/X
- Web based PDF preflight via optional HELIOS WebShare Action Script

Compatibility

- Acrobat 6/7/8 Professional compatible preflight profiles and engine
- PDF 1.2 - 1.7 and PDF/X
- "Form XObjects" PDF support
- Never modifies original PDF files, preserves job tickets and meta data

Supported server platforms

- Solaris, Linux, Mac, Windows, AIX

PrintPreview UB+

Local and Remote Proofing on Monitor and Printer
PostScript 3/PDF* Compatible Preview Rendering

HELIOS PrintPreview UB+ enables everyone to create precise proofs without needing to own a final output RIP. It renders accurate color-matched proofs of PostScript and PDF* print jobs which are saved as bitmapped pages in a PDF file. Ideal for pre-flighting, for local and remote proofs throughout the production cycle, and as a final job check prior to printing.

PostScript/PDF RIP allows proofing of composite, host or in-RIP separated print jobs. Previews include a color matched recombined color preview as well as all separation plates. Previews are based on the final output devices' PPDs and are true representations of the final output in all aspects regarding completeness and accuracy of page elements, correct colors, typography, and font usage. Today's printing features like transparencies, DeviceN, smooth shadings, knockout/overprint, ICC-CRDs, PostScript, TrueType and CID fonts are fully supported.

Color Fidelity can be verified on a monitor, or inkjet bitmap or PostScript color printers. The recombined and ICC

color matched proof simulates the final printing color and paper on the monitor or printer.

Full Job Control via printer queue based remote administration automatically opens the PDF preview files in Adobe Reader. The operator can check the jobs on screen or proof printer and release them for production, e.g. with a simple "drag and drop". Previews can automatically be saved into custom folders to be checked by other users or remote customers.

RIP Tool allows preflighting jobs and generating raw bitmaps of EPSF and PostScript jobs. HELIOS ImageServer option allows conversions to TIFF, PNG, JPEG, JPEG2000, and other formats.

PrintPreview requires HELIOS PCShare or EtherShare, or WebShare to receive print jobs from clients. HELIOS WebShare allows web based proofing. HELIOS PDF HandShake adds PDF support.

* PDF separations via HELIOS PDF HandShake or Acrobat Professional

Features & Benefits

Ease of Use

- Easy to install, administer, use
- Remote server administration from Mac, Windows and UNIX

RIP Features

- PostScript Level 1, 2 or 3 emulation
- PDF jobs via PDF HandShake option
- In-RIP separation support
- DeviceN and spot color support
- True color proof of separated jobs
- Previews of final separation plates
- RGB, CMYK, or CIE-Lab previews, e.g. for soft-proofing on monitor, for hard-copy proof prints
- Previews of pages with errors including all drawing until the error occurs
- PDF 1.3/1.4 based bitmap proof

Smooth Workflow

- Preview & proof to local Mac or PC printer, including non-PostScript
- Full control in HELIOS Admin, view, forward and release print jobs
- Printer queue based job processing
- Web proof via WebShare option

Cross-Platform Client Support

- Mac, Windows, UNIX clients

Smart Ideas for Better Networking.

System Requirements

PrintPreview on Server

- EtherShare UB+ for Mac clients, or PCShare UB+ for Windows clients, or WebShare UB+ for web clients
- For best performance, 64 MB RAM per active PrintPreview queue.
- PDF HandShake or Acrobat Professional for PDF separations

Product Highlights

Supports any PostScript Job

It does not matter on what platform and from which application a PostScript/PDF job was created. Standard separated jobs, jobs with any number of spot color plates, composite and in-RIP separation jobs are supported.

Structure of Preview Files

For each PostScript job sent to a HELIOS spool queue with previewing enabled, PrintPreview renders each page and saves the resulting bitmap proof pages into a PDF file. Separations are combined to provide an ICC color-matched composite proof of each page. The resulting PDF preview file includes a job ticket, and a chapter for each document page, containing the bitmapped separation plates (including spot colors) and the composite page preview.

Accurate Proofs

The preview file provides an accurate representation of the final output in all relevant aspects: completeness of page, correctness of page elements including OPI resolving, proper typography and fonts, color fidelity, and page geometry according to the final RIP's PPD. The previews allow reliable production checks just before the jobs are issued to the final RIP or press – a must for direct-to-plate/press/paper workflows or short-run digital color printing.

5/2008

Supported Jobs

Any separated or composite PostScript job; ADSC compliance recommended

Workstations for Previewing

- Any client with Adobe Reader
- Optional HELIOS WebShare for web-based remote proofs

Preview Queue Options

A PrintPreview queue is in essence a virtual printer, which saves a bitmap proof into a PDF file. It utilizes the final printer PPD and ICC profiles to accurately preview the final output.

Available options include:

- PPD specifies PostScript version, fonts, paper size, etc.
- In-RIP separation including DeviceN
- Inclusion of separation plates
- Inclusion of composite color pages (from composite and separated jobs)
- Resolution of preview bitmap
- Anti-aliasing of preview
- On-the-fly ZIP or JPEG compression of output bitmap
- ICC profiles for printer and proof
- Spot color editor allows specifying composite colors of spot names
- Output folder and hold/error queues
- Supports overprint and shadings
- Correctly renders transparencies and drop shadows

Preview's Job Ticket Information

PrintPreview includes text-based job information at the beginning of each preview document. It tells the necessary details about the job, including:

- HELIOS spool queue used
- Print client's name
- Date, time, and name of print job
- Number of pages in the job
- Preview resolution and color space
- ICC printer and proof profile settings

Remote Proofing

Web-based color-matched proofing of any job, page, resolution is supported with the HELIOS WebShare option. Preview files are stored in the queue's spool directory or in a shared volume. Jobs can be viewed and handled by any client with proper access to these directories using a PDF viewer.

ICC Color Proofing

PrintPreview queues can be set up to simulate the color capabilities of the final device on a monitor or printer. This offers convenient soft-proofing of the whole document with all its colors – be it raster images, vector graphics, text, graphical elements, etc. – on screen as well as easy hard-copy color proofs. Even color proofing on suitable, non-PostScript PC ink-jet printers is an option – achieved by printing the preview's proper RGB or CMYK bitmap with Adobe Reader.

Preview Handling in HELIOS Admin

For viewing in Adobe Reader, previews can easily be checked within HELIOS Admin and released for final output.

Flexible Licensing Scheme

The PrintPreview license is tied to a specific machine. The total number of licensed HELIOS users per day is permitted to use PrintPreview.
